TREATMENTS

BEAUTIFUL SKIN
WITHOUT SURGERY

CACI

Non-Surgical Facial Toning

CACI International has paved the way in anti-ageing, skin rejuvenation and problematic skin solutions for over for almost three decades. Our treatments are often described as the 'red-carpet beauty secret' and have attracted an impressive celebrity following including royalty, film stars, super models, beauty editors and make-up artists from around the globe.

We use the latest technological and scientific advancements to offer a range of treatment systems, which have been specifically developed to provide tailored solutions for men and women of all ages and skin types. Our treatment systems are at the forefront of aesthetic treatment technology.

The CACI Classic is our original microcurrent system and was the first beauty technology to be considered as a serious alternative to cosmetic procedures, enabling you to achieve beautiful skin without surgery.

Signature Treatment

CACI Signature Non-Surgical Facial Toning (60 minutes)

This treatment is a non-invasive facial, using microcurrent impulses. This will lift and tone your facial muscles and the neck area, whilst improving skin elasticity and reduces the appearance of fine lines and wrinkles. Firms your face and gives your skin a more youthful, fresh appearance and glow.

Express Treatment

CACI Hydratone (15 minutes)

This treatment is designed to deeply nourish, hydrate and firm the skin. Facial rollers emitting microcurrent impulses are gently massaged over the Hydro Mask. The rejuvenating energy transmitted through the rollers provides immediate and intensive hydration and helps to restore skin firmness, soften fine lines and rejuvenate your skin. Ideal for the treatment of dehydrated or sun damaged skin.

Please note: Express treatments can be performed as either stand alone or as add ons to any of our other treatments.

Eye Revive

Advanced Treatments

CACI Eye Revive (30 minutes)

Lift and firm muscles around your eye area, particularly where you may tend to lose definition as you age and develop. This treatment uses serum-filled microcurrent rollers together with the soothing and calming Eye Revive Mask to reduce puffiness and dark circles, and soften the appearance of fine lines and wrinkles around your eyes.

CACI Electro Cellulite Massage (30 minutes)

Give an instant lift, shape and tone to your buttocks and thigh area. This treatment improves the appearance of cellulite and breaks down fatty deposits. It stimulates circulation and lymphatic drainage, which will help to flush toxins away giving a smoother and tighter, dimple free appearance. This treatment is ideal for a pre-holiday body blitz.

CACI Jowl Lift (15 minutes)

Target muscle laxity around the jawline using CACI microcurrent. This treatment will lift and firm your muscles and redefine facial contours to give a firmer, more toned appearance. Ideal for those wanting to improve the appearance of sagging jowls or who desire a more chiselled jawline.

CACI Hand Rejuvenation (30 minutes)

This advanced conditioning anti-ageing hand treatment uses silver fibre microcurrent gloves in conjunction with CACI's Rejuvenating Hand Mask to smooth lines and wrinkles, firm skin, improve elasticity, boost circulation and brighten skin tone leaving your hands hydrated with a youthful appearance.

CACI Micro-Touch Facial (45 minutes)

The Micro-Touch Facial combines the muscle toning and lifting benefits of CACI's iconic microcurrent technology with hands-on treatment therapy using the Electro Gloves. The treatment focuses on muscle lift, tension release, deep tissue relaxation, and lymphatic drainage for more sculpted, toned, enhanced facial definition.

Please note: Advanced treatments can be performed as either stand alone or as add ons to any of our other treatments. Advanced treatments are not available with every Classic system. Check with your therapist to see if they offer these treatments.

FAQs

What is microcurrent?

Microcurrent therapy delivers tiny electrical impulses that mirror the body's own natural bioelectrical field. Microcurrent stimulation helps to re-educate the muscles and can lift, firm and tone. Microcurrent in aesthetics is commonly described as "facial toning" or "non-surgical face lifting" due to the dramatic lifting effect that it has on facial muscles and contours.

What does microcurrent feel like?

Microcurrent treatment is virtually sub-sensory with just a slight tingling sensation. Clients often describe it as an energised or warm sensation on the skin and is virtually painless.

Is microcurrent safe?

Yes. Microcurrent therapy was originally developed as a medical application to treat facial palsy and restore muscle tone by applying tiny microcurrent impulses to the affected muscles. Today this proven technology is now available in thousands of aesthetic clinics worldwide as a painless cosmetic treatment.

How many treatments should I have?

Although a remarkable difference is seen after the first treatment, the benefits are cumulative and typically a course of 10-15 treatments will be required for optimum results.

What happens after I have finished a course of treatments?

After a course of CACI treatments you will see real improvements in how your skin looks and feels. Your facial contours will look lifted and toned with a fresher, more youthful appearance. A monthly top up treatment is then recommended to maintain results.

What happens if I stop treatments?

It's just like going to the gym for a body workout. If you stop, the results will gradually diminish and your facial muscles may eventually return to how they were before treatments commenced.

Will there be any recovery or downtime after my treatment?

No. CACI treatments are non-invasive and gentle on the skin so there is no interruption to your lifestyle.

In what circumstances is treatment not advised?

Treatment is not advised if you have any of the following conditions; all forms of cancer, pregnancy, epilepsy, diabetes, heart condition/ cardiac pacemaker, thrombosis, facial implants (if treating face), skin disease (avoid area), skin lesions, recent surgery (performed within the last six months). Areas being treated with Botox® (wait three months) or dermal fillers (wait two weeks) should be avoided. Note: Anti-depressants, high blood pressure medication and other muscle relaxants may reduce the effectiveness of the treatment.

What are the Electro Gloves?

The Electro Gloves are made of an all-natural silver thread that is electrically conductive. During treatment microcurrent energy is transmitted through the Electro Gloves to provide Hand Rejuvenation and Micro-Touch treatments. The silver material used in the Electro Gloves also has antibacterial properties that help to calm the skin and reduce skin allergies.

Please note: If you are taking any medication or have an existing medical condition or concern not listed above, please consult with your doctor first.
